The purpose of this research study is to find out more about how the language that someone speaks impacts their language comprehension. We are inviting you to participate in a research study because you are a native speaker of English. If you agree to be in this study, you will take part in an online language comprehension task where you will be asked to read or listen to words or sentences and then respond to questions. After completing the game, you may be asked to fill out a couple short questionnaires. The entire study will take 15-60 minutes to complete.
